IF ANYONE wishes to believe me a little loony—which, might be possible, considering that I have quite intentionally made a considerable effort to insinuate that possibility indubitably—may now consider the preceding—as well as the following—proof more or less conclusive. Trust me on this.

The glyph most representative of what 666 is alleged to represent is...\$

20pt

Why? Because a money changer (who changes money in the opposite direction from which Jesus would, I figure, do) walked into a temple (in name only; details to follow) which, I suspect, is Christian in name only (doh!), declared that all the money in the temple was Caesar's (if he gets the job and, brother, is Mitt **THE right tool for the right job;**

Doubts over insect bite treatment

60pt

People should consider using a cold, wet cloth to treat insect bites instead of turning to over the counter remedies, experts say. Prof Michael Si va Jothy, from Sheffield University's Department of Animal and Plant Sciences, recruited 29 brave volunteers to test the theory further, watching the bedbugs as they found a place to feed and removing them only as they were about to bite.

28pt

22pt

An investigation has concluded that there is little evidence that creams, painkillers and anti inflammatories often used for bites actually work. In any case, said Drug and Therapeutics Bulletin researchers, the reactions got better by themselves in most cases.

Midges, mosquitoes, Flies, Fleas and bed bugs account for most bites. A variety of remedies are sold over the counter in pharmacies to relieve the itching, pain and swelling. Other scientists have suggested that swapping thicker fur for clothes was a way of making insect

bites and parasitic infestations less likely. Prof Mark Pagel, an evolutionary biologist at the University of Reading, said that biting parasites remain a major cause of disease and death worldwide, making them a potentially enormous evolutionary pressure on early man.
